Node js

WORK EXPERIENCE

Senior Software Engineer Accenture

12/2017 – Present

Bangalore Karantaka

Achievements/Tasks

- I work in a project which is a web application which helps end-user in enrolling into Health Coverage. This provides the facility of filling application and choosing a health plan to the user.
- I am responsible for developing various modules for the application and along with this, I am supposed to estimate the work and also support junior members in writing maintainable code.
- Skills used are - ReactJs, Flux, HTML5 and CSS3 [🔗](#)

Senior Software Engineer Mindtree Ltd

06/2015 – 12/2017

Bangalore Karnataka

Achievements/Tasks

- This project is of Airline Domain. We developed a web application in which end-user enter details of the baggage at the airport and generate the bar code. This tracks the baggage till its journey and in-case baggage is lost we create an application for that also. This is a complete baggage management system used at major airports.
- I was working here as Senior software engineer and was responsible for delivering the maintainable code and I was mentoring one small scrum team.
- Skills Used: AngularJS 1.6, HTML5, CSS3, Jquery

Contact: Jitendra Kumar Sharma

Software Engineer Kalpakosh Software Solutions Pvt Ltd

08/2013 – 12/2015

Bangalore Karataka

Achievements/Tasks

- We developed a web application which provided study materials for almost all the compative exams along with school notes. This also provides online test series to test student's exam preparation.
- I was responsible for developing back-end modules with django/python. I was also part of front end development. Here i was also responsible for devops.
- Skill Used are: HTML5, CSS3, Jquery, Django, Python

Contact: Mayank Rungta
